GAYATRI

Control and Automation Private Limited

Matters of pride & precision

ABOUT US

Our Legacy of Excellence

Founded in **1995**, Gayatri Control and Automation Private Limited has grown into a respected industry leader with more than **three decades** of experience in delivering state-of-the-art industrial solutions. Over the years, the company has built a strong reputation for consistency, innovation, and unwavering customer focus.

In **2003**, GCAPL achieved the **ISO 9001:2000 certification**, marking an important milestone in its commitment to standardized processes and quality-driven operations. Today, the company is widely recognized across the Automation Industry for manufacturing durable, efficient, and precision-engineered control panels that meet the highest industry standards.

At the heart of GCAPL's success lies its ability to combine advanced technology with customized engineering. The company specializes in developing **bespoke control systems** that align with the unique needs of each customer—ensuring enhanced performance, long-term reliability, and complete satisfaction with every solution delivered.

OUR VISION

Empowering industries with precision-engineered control panels, defined by unparalleled quality and service excellence.

OUR MISSION

To engineer and deliver cutting-edge automation solutions, blending precision design with robust quality, and providing service that drives our clients' success in an increasingly automated world.

FACILITIES & EXPERTISE

An experienced and well-trained technical team, backed by a spacious manufacturing floor equipped with state-of-the-art machinery and advanced testing facilities, enables us to deliver exceptional quality and performance. This strong infrastructure allows us to offer the best solutions tailored to our customers' needs

Proposed Unit-2 is planned over a vast 50,000+ sq. ft. area

**CERTIFIED FOR
QUALITY, SAFETY, AND PERFORMANCE**

**OFFICIALLY
ACCREDITED**

UL508A Control Panel Manufacturing

We specialize in UL508A-certified control panel manufacturing, delivering high-quality solutions for both large-scale industrial automation and custom-built applications. Our team ensures every panel is engineered, assembled, and tested to exact specifications, providing reliable performance, timely delivery, and exceptional value.

Control System Architecture

Our engineers design control panel systems with precision and practicality, creating solutions tailored to each application. Design capabilities include PLC- and HMI-based panels, batch process control, SCADA-enabled panels, RTU panels, and redundant control architectures—ensuring seamless operation and scalability.

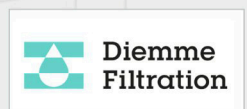

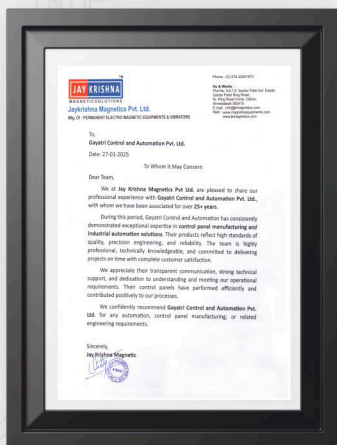

System Integration Excellence

We follow a structured approach to control panel integration, ensuring every component works together as a unified, robust system. With deep expertise in selection, configuration, wiring, and testing, our engineering and manufacturing teams ensure that each panel is reliable, intelligent, and built to perform in demanding industrial environments.

HONOURING OUR COMMITMENT TO INNOVATION AND CUSTOMER SUCCESS
